

# Fusion Line

# Welcome to the future of synthetic grass.

## Exceptional stability against reflected heat.

While typical synthetic grass products will show deformation in high-temperature situations, the ForeverLawn Legacy Fiber yarn will not fail where others do. This makes Fusion the ideal solution for rooftops and around glass buildings where heat damage is a concern.

## Superior performance in high-traffic environments.

With its proprietary nylon blades, this synthetic grass provides exceptional wear performance compared to typical polyethylene products. Fusion's stronger, more resilient Legacy Fiber yarn stands up to consistent use in areas with extreme high traffic which makes it the preferred option for commercial projects.

## The most natural appearance on the market.

In addition to high performance, Fusion provides an increased realism that surpasses typical products. The several hues of green and tan present in both the primary blades and thatch zone make Fusion an excellent option that looks natural and beautifies any application.

**Consult with your local ForeverLawn dealer to incorporate  
ForeverLawn Fusion into your project today, and experience  
the true meaning of Grass Without Limits.®**

# Beautiful. Durable. Resilient.

ForeverLawn® Fusion™ featuring our proprietary Legacy Fiber™ yarn, combines premium performance with natural appearance. The grass blades in Fusion can endure temperatures up to 200 degrees higher than standard polyethylene artificial grass without experiencing melting or deformation.

**Fusion Elite** is perfect for projects where low-E windows reflect heat from the sun, such as on rooftops, near glass buildings, and around newer homes and offices.  
\*same color as Fusion Pro

**Fusion Prizm** provides unmatched softness with the perfect presentation of colors for a vibrant and realistic surfacing solution. This makes it the ultimate option for both commercial and residential projects.

**Fusion Pro** is ideal for high-traffic areas such as wedding lawns, event centers, storefronts, and other active venues.
